

Petrotex 6040.

Petrotex 6040 is a soft carboxylated styrene-butadiene (SBR) Latex Emulsion

Product data

solids content	%	47±1
viscosity Brookfield sp.2, 12RPM at 20°c	cps	20-100
PH at (25°c)		9±1
density	g/cm ³	1.015±0.005
surface tension at 25°c	(Dynes/cm) at 25°c	45±5
Apearance		Milky White
Dilatability		easily dilute with water

Application and Advantage

Petrotex SB 6040

This product includes advantages such as excellent flexibility, that will strengthen bonding between old and new concrete and users will also experience very high abrasion resistance and higher resistance to waterpenetration.
