

## Petrotex 8810

Petrotex 8810 is a medium soft carboxylated styrene-butadiene (SBR) Latex Emulsion

### Product data

solids content	%	50±1
viscosity Brookfield sp.2, 12RPM at 20°c	cps	200-500
PH at (25°c)		8±1
density	g/cm <sup>3</sup>	1.01±0.05
surface tension at 25°c	(Dynes/cm) at 25°c	45±5
Apearance		Milky White

### Application and Advantage

Petrotex 8810

It is designed for finishing woven carpets. it can be used for full bath impregnation. of needlefelt and for application in lick roller trough. the viscosity can be adjusted by thickeners. For the application the dispersion can be diluted.

### Storage and delivery

Petrotex 8810 is can be delined in road tankers 1ton containers and drums. It must be stored In above 5°c and stable for 6 months. Petrotex 8810 should be stirred and mixed befor use.
