

Petrotex 8800

Petrotex 8800 is a soft carboxylated styrene-butadiene (SBR) Latex Emulsion

Product data

solids content	%	50±1
viscosity Brookfield sp.2, 12RPM at 20°C	cps	200-500
PH at (25°C)		8±1
density	g/cm ³	1.01±0.05
surface tension at 25°C (Dynes/cm) at 25°C		45±5
Apearance		Milky White

Application and Advantage

Petrotex 8800

It is designed for finishing woven carpets. it can be used for full bath impregnation. of needlefelt and for application in lick roller trough. the viscosity can be adjusted by thickeners. For the application the dispersion can be diluted.

Storage and delivery

Petrotex 8800 is can be delined in road tankers 1ton containers and drums. It must be stored In above 5°C and stable for 6 months. Petrotex 8800 should be stirred and mixed before use.
